

The Mechanical Vision Corporation

Jake Salomon • jake@mechanicalvisioncorp.com • +1-512-771-9570

**Maintenance keeps the world running.
We're automating it.**

We start in aerospace.

The fleet keeps aging.

Oldest fleet in history, and a 12-year backlog to replace it.

IATA / Cirium, Airbus / Boeing

The experts are retiring.

710,000 new maintenance technicians needed worldwide by 2044.

Boeing

It still runs on paper.

Regulators only cleared the path to digital documentation in 2023.

EASA

40%

of an aerospace technician's day disappears into paperwork,
not turning wrenches.

MVC customer discovery, supported by [McKinsey](#) and [FAA research](#)

40%

of a tech's day
lost to paperwork

\$48K

in labor spend per
technician per year.

$40\% \times 2,000 \text{ hours/year} \times \$60/\text{hour loaded labor}$

40%

of a tech's day
lost to paperwork

\$48K

labor spend per
technician per year

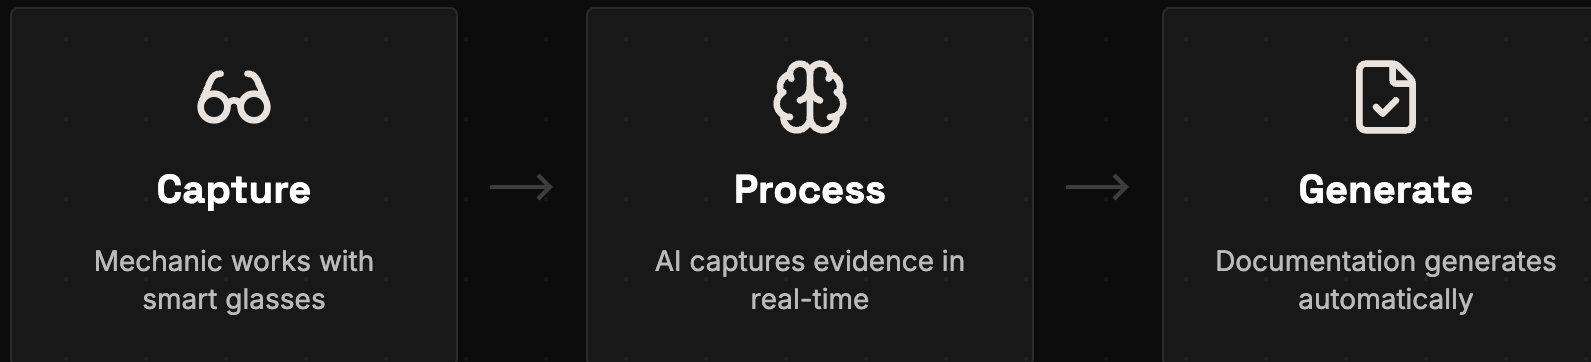

\$1.9M

per 40-person
shop per year

$40 \text{ people} \times \$48\text{K/person/year} = \1.9M/year

What if the documentation wrote
itself while the technician works?

How It Works

2 hours of paperwork → 10 minutes

The Market is Ready

DESIGN PARTNERS

“I think this could be actually gold. I really do.”

Maintenance Operations Executive

“We don’t have to do the three hour job again to try and find or redo everything. That is many hours, that’s helicopter downtime.”

Flight Operations Executive

“All in all, I think something like this... could be extremely beneficial.”

Director of Engineering

“I think there can be fantastic use cases here, fantastic improvements.”

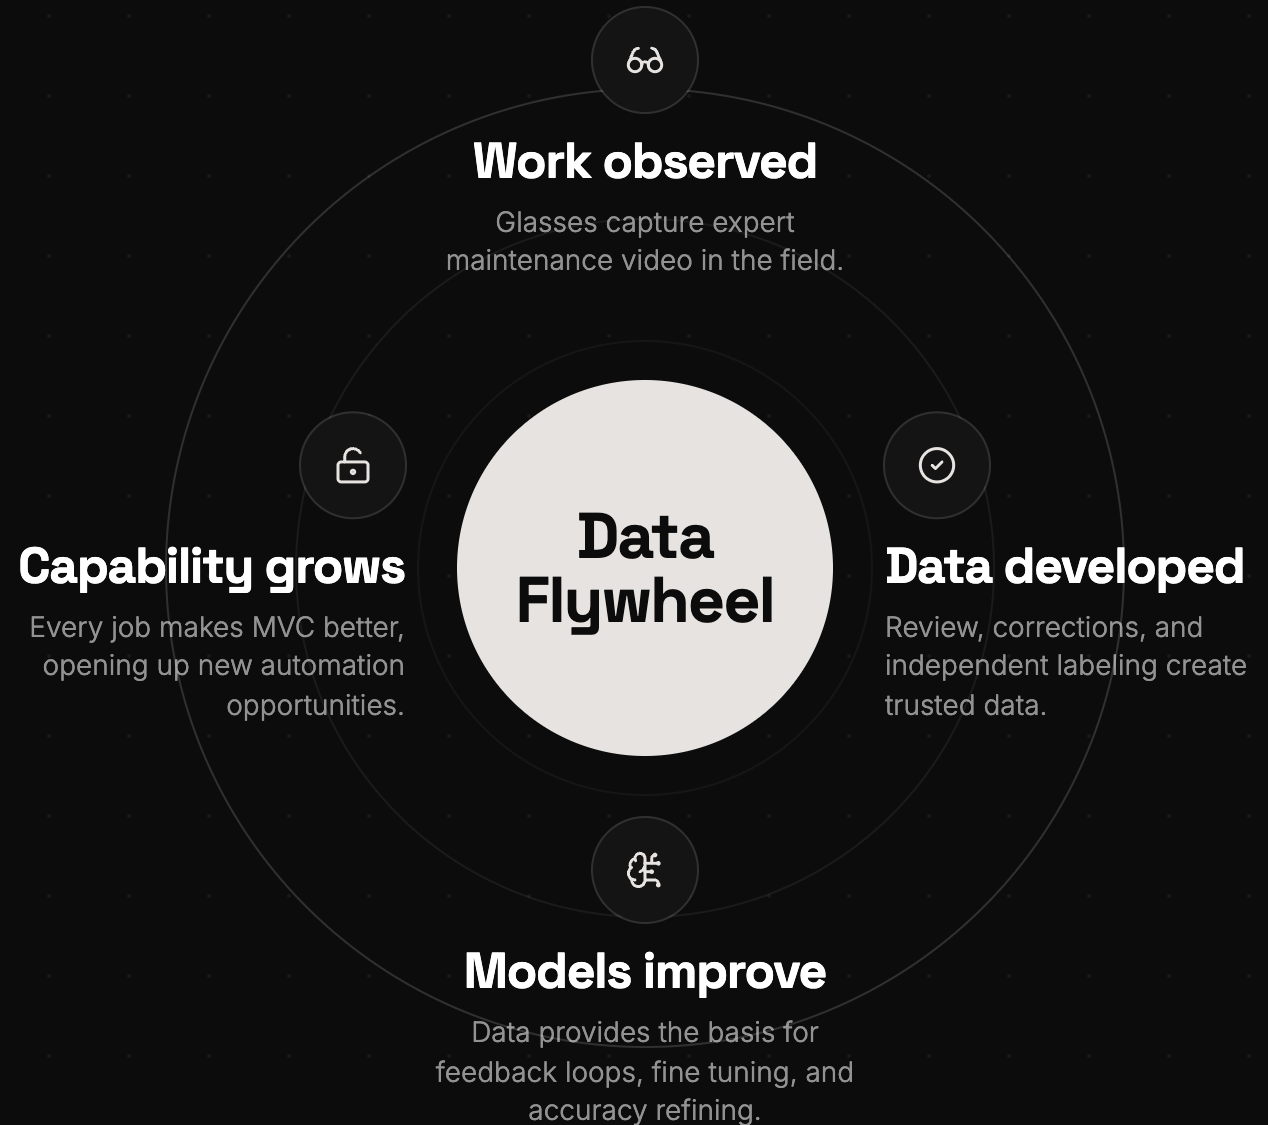

IT Leader

“That’s like the best traceability you can think of right there... I can see that definitely helping out with the quality side.”

Manufacturing Leader

The Moat Compounds

Every reviewed job creates a training signal MVC learns from.

Aerospace is the Wedge.

Documentation-Heavy Technical Work
is the Market.

Total Addressable Market

Global documentation automation for **high-value technical labor** across maintenance, inspection, cleanrooms, and technical operations

Serviceable Addressable Market

Aerospace documentation automation opportunity: **civilian + defense aviation** maintenance, repair, and overhaul

Serviceable Obtainable Market

American civilian aerospace maintenance worker base of **192,000 people**

Wedge

25k U.S. Aviation Inspectors

~\$150M at \$500/seat/month

\$85B

Technical work-capture TAM

\$5B

Aerospace + defense aviation
SAM

\$1B

American civilian
aerospace SOM

THE PRIZE

Automating all maintenance

\$1T+

annual skilled maintenance labor spend

MVC App Layer

fine-tuned with proprietary field data

Model Layer

VLA models from NVIDIA, OpenAI, etc.

Hardware Layer

Figure, Unitree, Tesla, etc.

Hardware and models commoditize. The data-rich app layer is where value accrues, and it's the only layer we need to own.

Jake Salomon

Founder

-  **Sells AI to manufacturers.** Product lead at Circuit, an AI company that raised 10s of Millions. Helped grow pipeline to >\$8M in 6 months.
-  **Early startup operator.** Employee #5 at Ika (formerly dWallet Labs), which reached a \$250M valuation.
-  **Corporate strategy.** Accenture Strategy for Fortune 500 clients, including global manufacturers.

Duke
UNIVERSITY

THE ASK

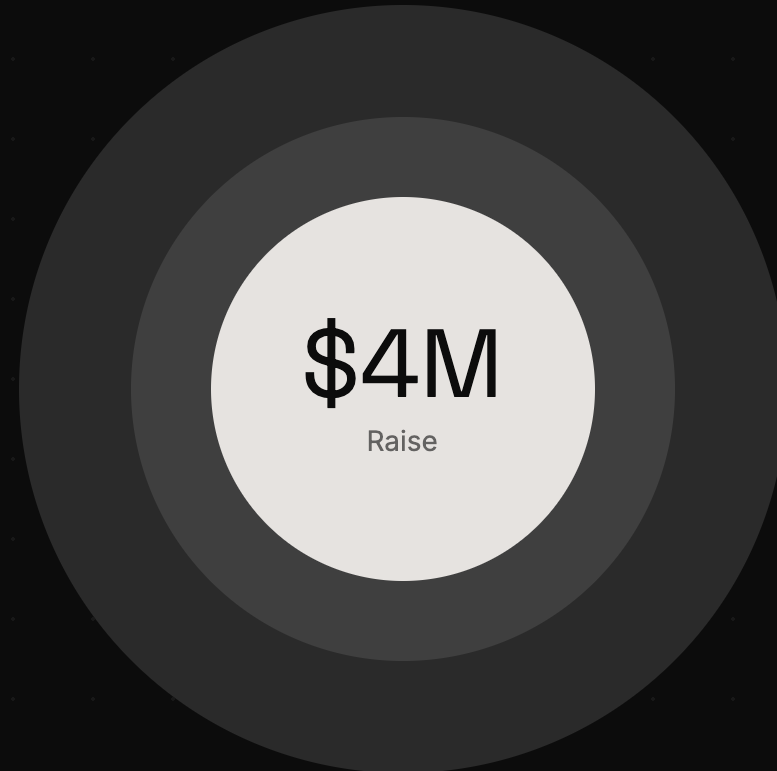

Pre-Seed Round

USE OF FUNDS

- 75% Team & Engineering**
VP of Engineering, 3 engineers, 3 data labelers
- 15% Product & Data Moat**
AI pipeline, smart-glasses fleet, the labeling that builds the asset
- 10% Operations**
SOC 2, security, legal, infrastructure

MILESTONES

- ✓ 3 paid production contracts
- ✓ 65,000+ hours of labeled aerospace maintenance data
- ✓ Production data flywheel: every reviewed job improves the next one

SAFE

To paid deployments and a Seed raised from strength

The Mechanical Vision Corporation

The technician works. The paperwork writes itself.
